SCIENCE

Attempt any four of the following questions:

1. Visit the greenhouse if there is one near your place. observe how they grow plants .find out how they regulate the amount of light, water and carbon dioxide to grow the plants.

Make a project file on above data

2. Find out what vitamins are and get the following information:

Why are vitamins necessary in the diet?

Which fruits or vegetables should be eaten regularly to get vitamins?

Write brief note on the information collected by you on a project file. you may take help of a doctor, a dietitian, your teacher or any other person or from any other source.

3. Look for eggs of any moth or butterfly in a garden or park or any other place full of plants. they look like tiny dots lead in a cluster on The leaves. pull out a leaf containing eggs and place them in a cardboard box. Take some leaves of the same plant or another plant of the same variety of them and put them in the box . eggs will hatch into caterpillars which are busy eating day and night.

Observe everyday

note the :

(i) number of days taken for eggs to hatch (ii) number of days taken to reach the cocoon stage and (iii) number of days to complete life cycle. record your observation and make a project file.

4. Go to a doctor or your nearest health centre. Observe the doctor taking temperature of patients. enquire:

(a) Why she dips the thermometer in a liquid before use.

(b) why the thermometer is kept under the tongue.

(c) whether the body temperature can be measured by keeping the thermometer at some place other than mouth.

(d) whether the temperature of different parts of the body is the same or different.

You can add more questions which come to your mind and make a project file.

5. Collect information about the types of fuels used for cooking in your area . which fuels are less polluting and why and make a project file

6. Collect information about the Indian meteorological department. If possible visit its website:

[http://www imd.gov.in](http://www.imd.gov.in)

Write a brief report about the things that department does on a project file.

7. You can make your own anemometer.

Collect the following items:

4 small paper cups (used icecream cups), two strips of cardboard (20 cm long and 2 cm wide), gum ,stapler a sketch pen and a sharpened pencil with eraser at one end.

Take a scale; draw process on the cardboard strips as shown in the figure 8.18 in NCERT book science of class 7 this will give you the centres of the strip.

Make this model and write brief about it on project file.
